

--UPGRADE MANUALLY--

Firstly please you should copy the link below and paste the browser on any computer. The Tegsoft_patch.tgz should be downloaded.

https://www.tegsoft.com/Tegsoft_patch.tgz

Secondly, You should install WinSCP tool for the file copy to the your server. You can use following link for downloading.

<https://winscp.net/eng/download.php>

The tool will ask to you server informations.

File protocol: SCP

Hostname: TEGSOFT_IP

Port: 2222

Username: root

Password: ROOT_PASSWORD (If this is unknown, I can share it with separate email)

And then you can login. The interface in tool, the left side is your computer and the right side is your server. In left side, Downloaded file (Tegsoft_patch.tgz) should be found. In right side you should go following directory

`/<root>/opt/jboss/server/default/deploy`

In this directory, previously uploaded. Tegsoft_patch.tgz should be deleted and new file should be copy left to right.

After all the steps have been completed , you should connect to the server with ssh. And then the following procedure run step by step.

--/////-----

```
cd /opt/jboss/server/default/deploy/
```

```
rm -rf /root/bk
```

```
mkdir /root/bk
```

```
mv /opt/jboss/server/default/deploy/Tobe.war /root/bk/  
tar -xzvf Tegsoft_patch.tgz
```

```
rm -rf /home/tobe/sql/  
mkdir /home/tobe/sql/  
cp -r /opt/jboss/server/default/deploy/Tobe.war/sql/* /home/tobe/sql/
```

```
su - tobe
```

```
db2 connect to tobe;db2 -Ctvf /home/tobe/sql/1_Tobe_01_Create_db2.sql;  
db2 connect to tobe;db2 -Ctvf /home/tobe/sql/1_Tobe_03_ALTER.sql;  
db2 connect to tobe;db2 -Ctvf /home/tobe/sql/1_Tobe_04_INDEX.sql;  
db2 connect to tobe;db2 -Ctvf /home/tobe/sql/1_Tobe_10_DML.sql;  
db2 connect to tobe;db2 -Ctvf /home/tobe/sql/1_Tobe_11_ALARM.sql;  
db2 connect to tobe;db2 -Ctvf /home/tobe/sql/1_Tobe_12_ACCESS.sql;  
db2 connect to tobe;db2 -Ctvf /home/tobe/sql/1_Tobe_98_Menu_TegsoftPBX.sql;
```

```
exit
```

```
service tegsoft_icr restart  
service tegsoft_web restart
```

```
